Message from the CEO

Maersk's Core Values and related business standards are more than just words; we live by them each day and they determine how we make and prioritise daily decisions, ultimately ensuring the long-term success of the company.

The Maersk Code of Conduct has been developed considering requirements of stakeholders, while also taking into account the economic, social and environmental challenges that impact our business.

The Code provides guidance on what we stand for as a company, and it governs how each brand, business unit and employee within Maersk engages with customers, authorities, colleagues, suppliers, the community and other stakeholders. It outlines our commitment to responsible business practices and the key principles that form our approach to sustainability.

"Competitive pressure is always mounting in business, however, we ensure we conduct business with high integrity, following all relevant laws."

One of our Values is "Our Employees" and we constantly strive to create the best environment for our people.

Competitive pressure is always mounting in business, however, we ensure we conduct business with high integrity, following all relevant laws. With rapid increase in digital transformation, it is important to safeguard information and protect our organisation against any cyber threats. We always ensure that we work towards being a part of the solution to global sustainable development challenges. These are only a few examples, but you will find more as you read further.

All employees across Maersk, and those acting on behalf of Maersk, shall follow this Code of Conduct. If anyone sees inconsistencies with our code, they are empowered to report misconduct.

Our deeply rooted Values and their impact on how we conduct business, are the reasons why customers trust us with their business. Together, with our shared commitment of following the Code of Conduct, we will continue to maintain an environment of integrity and good business practice well into our future.

Our Code of Conduct

Maersk is transforming from a conglomerate to an integrated company in order to become the global integrator of container logistics, connecting and simplifying customer's supply chain. This transformation offers a new lens from which to look at our business, and governance is no exception.

In close consultation with colleagues across the organisation, the Core Values and selected Commit Rules have been consolidated into this Code of Conduct which replaces any previous brand specific Code of Conduct in place.

The Maersk Code of Conduct is a single source of reference for all employees and those that represent Maersk. It will ensure that employees and other stakeholders know what we stand for as a company and how to interact with colleagues, competitors, customers and suppliers.

The Code of Conduct does not cover every possible situation, but guides towards good judgement and requires high ethical standards of everyone. Employees and other stakeholders are encouraged to speak up when they have questions or concerns. There may be times when local laws, regulations or customs conflict with our Code. Whenever there is a conflict or a difference between an applicable legal requirement and our Code, always seek guidance while complying with the law. Do not follow customs or old habits that violate this Code.

OUR CODE OF CONDUCT

As employees of Maersk, we have the responsibility to take a proactive approach to our own health and safety and to the wellbeing of others. OUR CODE OF CONDUCT

Following the law and acting with integrity

FOLLOWING THE LAW AND ACTING WITH INTEGRITY

Responsible payments

At Maersk, we ensure all payments are responsible. Payments never involve corruption, bribery, money laundering or unauthorised political donations. We do not tolerate corruption nor bribery, no matter how small the amount.

Corruption can take many forms and it does not necessarily involve money. Certain gifts or entertainment can also be considered a bribe depending on the value. We never offer, authorise or accept bribes, kickbacks or anything of value for the purpose of obtaining or retaining business or any other improper advantage for Maersk. This also means that our employees and representatives never accept, give or promise payments or considerations that could be interpreted as intending to improperly influence a governmental or commercial decision.

At Maersk, we strive to ensure that our business is never used as a vehicle for illegitimate flow of money, neither in our core business nor through the financial services we provide. Specifically, we ensure that adequate counterparty screening is made when we make outgoing payments to vendors or customers.

Maersk is committed to secure internal transparency and control with any political donations. Financial donations or other donations of monetary value should never be given to political parties, candidates, governments or other public authorities without prior approval. All political donations are reported to authorities in accordance with national laws and regulation.

Please be mindful that:

- Small gifts and entertainment can be provided if they are strictly business related and in accordance with internal guidelines and in compliance with local and international laws in the countries where we operate. Gifts of cash and cash equivalents such as gift vouchers (i.e. voucher for music, meals, etc.) and prepaid cards for external parties are prohibited.
- Donations of monetary value cannot be given to political parties, candidates, governments or other public authorities unless advance approval has been obtained in accordance with internal rules.
- Interacting with government officials is often an integral part of doing business at Maersk. Be mindful that some jurisdictions impose strict procedures and rules on how private parties may interact with government officials. As an employee of Maersk, it is your responsibility to ensure that you are familiar with any procedures and requirements set by the recipient and that of Maersk.
- We are responsible for what others do on our behalf. We do not use third parties, such as agents, consultants, advisors or brokers, to do what we are not permitted to do ourselves. Maersk should only engage with third parties when there is a legitimate business need and where background checks do not result in any reason for concern.

FOLLOWING THE LAW AND ACTING WITH INTEGRITY

Countering fraud

Fraud is a deliberate deception with the intent to gain direct or indirect personal advantage at the expense of or to the detriment of Maersk. We resist committing to or being complicit to committing any act or attempt of fraud.

We act objectively and in the best interest of the company, by avoiding any conflict of interest or the perception of such.

Company resources are used for business purposes only, unless any exceptional (i.e. temporary) non-business usage has been authorised in writing by their supervisor.

Please be mindful that:

- We refuse any favors (i.e. financial or non-financial) offered by any external party with the intent to provide this party with a preferential or more favorable treatment by the company.
- We ensure financial and non-financial statements, either for external or internal purposes, are always prepared free of any intentional misstatement.
- We prepare expense reports only for expenses that were made.
- We do not influence the hiring decision-making process if the person being hired is a friend or a family member.
- We do not influence the decision-making process in the vendor selection process for a friend or a family member.
- We only use company resources such as company credit cards strictly for business purposes.

“We resist committing to or being complicit to committing any act or attempt of fraud.”

Competition compliance

Maersk is committed to conducting business in compliance with all competition laws globally and will continue to compete fairly while maintaining business. We always adhere to and encourage compliance with competition laws at all levels of the business.

At Maersk, we have a culture that values, encourages and requires compliance with competition laws throughout the organisation, driven by a comprehensive and effective competition compliance program that ensures all employees understand and comply with applicable competition laws.

Please be mindful that:

- We interact with customers and suppliers lawfully while delivering superior products and services.
- We independently compete for business, determine our own prices and terms of supply to our customers.
- We always value and protect our confidential and competitive strategic information while also respecting the confidential and competitive strategic information of others.
- We adopt appropriate safeguards to ensure compliance with competition laws when engaging with competitors, including in the context of joint ventures, operational agreements and at industry association meetings.

“We always adhere to and encourage compliance with competition laws at all levels of the business.”

FOLLOWING THE LAW AND ACTING WITH INTEGRITY

Trade controls

Maersk's global business consists of many operations and transactions that are subject to foreign trade controls. Foreign trade controls are national and international laws restricting business transactions with certain countries, organisations and individuals (i.e. economic sanctions). Foreign trade controls limit the transfer of certain goods, technologies and software between countries (i.e. export controls).

Please be mindful that:

- European Union sanctions apply to our business globally because Maersk is incorporated under the laws of Denmark and Denmark is an EU member country. Thus, we refrain from having commercial or financial dealings with parties subject to EU sanctions.
- Given Maersk's global footprint, other national or international sanctions regulations may apply to our business. For example, the United States of America sanctions regulations restricting any USA involvement.
- We pay special attention to dealings with highly sanctioned countries or parties as these dealings may be restricted. Please refer to the Highly Sanctioned Countries List.
- We check if a business partner or a third party with whom we do business with is sanctioned or listed on a restricted party list, and if confirmed, we must terminate the relationship immediately.
- Export control regulations cover the actions required to identify the items that are subject to licenses when they are exported from one country to another and it is our responsibility to assure all required approvals and licenses are obtained within these regulations.

"Given Maersk's global footprint, other national or international sanctions regulations may apply to our business."
